Metropolitan Denver Dental Society's Mountain West Dental Institute Gains New Cone Beam Technology

DENVER – March 31, 2016 – Thanks to the generosity of Henry Schein Dental and Planmeca USA, Inc., the Mountain West Dental Institute (MWDI) now boasts the latest in Cone Beam Computed Tomography (CBCT) technology: The Planmeca ProMax 3D Mid. This multi-faceted unit offers digital panoramic, digital cephalometric and 3D imaging, photos and model scans; all at optimal dose radiation levels.

The Planmeca ProMax 3D Mid provides CE course attendees hands-on learning experience on all features of this device. The cephalometric capabilities allow for more in-depth, hands-on orthodontic courses to be offered. Additionally, the features for diagnosing ear, maxillary sinus and respiratory tract diseases can be applied to a wide variety of healthcare groups.

For more information on the MWDI, The Planmeca ProMax 3D Mid or to book an event at the facility, please contact, Jill Kingen, MDDS Senior Facility & Events Manager, at (303) 488-9700 ext. 3274 or events@mddsdentist.com.

The Mountain West Dental Institute is a dental learning facility owned and operated by the Metropolitan Denver Dental Society (MDDS), a not-for-profit component of the American Dental Association and the Colorado Dental Association. For more information about MDDS, please visit mddsdentist.com or contact Cara Stan, MDDS Director of Marketing & Communications, at (303) 488-9700 ext. 3270 marcom@mddsdentist.com.
